Winton Six Holds World's Record For Low Upkeep

Low upkeep cost indicates a car that keeps out of repair shops, that avoids repair bills, that will stand up and be ready to go its proudest when wanted. A car that must be nursed and petted, hoisted up, repaired, and overhauled, cannot earn a low upkeep record. Nor will the most skillful driving get from a car in service more than its maker put into that car when it was built. Therefore, trustworthy upkeep figures indicate how much quality, how much real intrinsic merit, that car itself possesses.

Elephant Butte, N. M., Sept. 15.—The rush for lots in the Sunny Slope addition to Elephant Butte is now on. The lots are free. All one has to do is to ask for them and have sheriff Putnam make the location. No deed can be secured, but one can occupy them as long as good behavior prevails. The new addition is east of Main street and between Sully's Heights and the reservoir for the government corral. The streets have not yet been graded, but the waterworks system has been extended to meet the requirements. New furniture has arrived for the officers' new quarters and a part of it is now being moved. The boys slept in fine, new beds that night. New chairs also arrived for the dining rooms for the officials' mess. It is required that the entire care for the furniture for these buildings.

Another Schoolhouse. As there are 304 children of school age and the schoolhouse already built is found to be not large enough to accommodate this number, plans are being drawn for another school building, which will be built at once.

General Superintendent. Fauntleroy suffered a slight though not serious accident on Friday afternoon by being thrown from his horse. He was generally shaken up and had the third finger on his right hand knocked off of joint, requiring the attention of a physician.
